

# UNESCO Supporting Viet Nam to Become a Knowledge-Based Society

## Defining a joint roadmap to reach the goal:

Cross cutting methodology:

- Capacity Building (\*4)
- Use of simulation model through computer software
- Participatory and inter-sectoral approach

**\*1**  
**The Policy Review will cover:**

- Macro-economic and socio-demographic frameworks
- Managerial and institutional aspects
- Quality education
- Environmental sustainability
- Inclusiveness (ethnic minorities/vulnerable groups)
- Social transformation
- Access to quality information

**\*2 Comparative Analysis**  
 Good practices from other countries, e.g. Japan, Korea, Singapore, Indonesia:

- Policies
- Legislation
- Management
- Educational Structure

**\*3 Risk analysis on:**

- Natural Disasters/Climate Change
- Migration
- Exclusion of 21<sup>st</sup> century skills (e.g. ICT)
- Stigmatization
- Illiteracy
- Lack of access to quality education for ethnic minority and other vulnerable learners
- Economic Risks

**\*4**  
**Capacity building** throughout entire programme, as well as in:

- defining the desired profile for Viet Nam's Knowledge-Based Society
- use of simulation model through computer software
- change management
