SHOWERHEADS

waterAUSTRALIA

# Our Technology

- **Perfectflow** develops, manufactures and distributes a range of world class Water Saving Showerheads that incorporates globally protected patented technology
- Showerheads operate at 1.5 Gallons Per Minute (Ultra Low Flow) / Suits new EPA Watersense Specifications
- Serves the Domestic / Residential and Commercial / Hotel Market
- Superior in design (Solid Cone Spray NOT Hollow Cone spray) Gives feeling of more water without having to adopt inferior Venturi/Aeration techniques found in other water saving showerheads
- Utilized widely by the NSW (Sydney) State Government Energy Saving Scheme
- Over 150,000 homes retrofitted / Proven

# Customer Benefits

- Substantial water cost savings. [ Acquisition costs verse conservation costs ]
- Substantial reduction in energy cost in supply of water to utilities
- Substantial reduction in energy cost in removal of waste water to utilities.
- The saving of millions of tons of greenhouse gas emissions
- Water Savings in millions of gallons per year to water utilities that can be re-applied to farmers in the Central Valley
- High Quality long lasting product backed with full warranty which is available in different finishes to ensure high uptake
- Easy Installation (DIY no Plumber)
- Easy to market to customer base
