

# STAR Water Solutions

*The Future of Water*

# Our Technology

## Reactive Filter Media Systems

- Physically, Chemically & Biologically treat water & a wide range of effluents for re-use or recharge
- Effectively and economically treats pollutants so that water & effluents can be re-used especially where water is getting scarce
- Technology is used in stormwater, grey water, industrial & agricultural markets
- It uses no energy to treat, can be manufactured in most urban communities and uses a high proportion of recovered resources
- STAR Water Solutions has exclusive worldwide license and local licensed distributor is Clean Green Technology Inc. Huntington Beach, CA.
- B C Highways, British Columbia, City & County of Honolulu, Manly Council, Marrickville Council , Waverley Council & private sector developments

# Customer Benefits

## Benefits the product will provide

- Cities & businesses can reduce pollution levels into receiving waters to below threshold levels
- Treated water can substitute their potable consumption reducing costs
- Systems can help cities replace aging drainage/water infrastructure and mitigate against local flooding
- Pre-installation analysis can allow clients to predict lifespan
- Lower operating costs than mechanical treatment
- Local distributor network to provide back up support

# Contact

- Wishing to meet with city engineers, water utilities, catchment authorities & businesses using/managing water
