

WEBINAR BLOCKCHAIN OPPORTUNITIES IN INDIA

Join this interactive webinar on Blockchain opportunities in India

ABOUT THIS WEBINAR

In India, Blockchain adoption has seen a lot of traction in 2016. Many banks and business conglomerates have experimented with blockchain across a range of use cases. Although blockchain is still in its nascent stage, Bitcoin - the most popular use case of blockchain, has picked up quite well in India with a number of Bitcoin exchanges and wallets spreading across the country. The regulatory bodies have also taken cognizance of the potential of blockchain technology and are forming working groups to understand and oversee its growth in India.

Join this webinar to understand the overall blockchain technology landscape in India, where the opportunities are, and how you can benefit from this in the long run.

WHY YOU SHOULD ATTEND

- Hear about the overall blockchain landscape in India.
- Understand the opportunities and the areas of collaboration.
- Understand the Indian government's take on blockchain and cryptocurrencies.

WEBINAR

Nick Giurietto

Chief Executive, Blockchain Australia

Nick Giurietto leads Blockchain Australia, Australia's industry body for organisations driving business change and developing new business models using blockchain technology.

Nick was responsible for the development of the Australian Digital Currency Code of Conduct which establishes best practice standards for digital currency businesses in Australia and has been modelled in other countries.

Nick has worked with the Australian Government on issues including the taxation treatment of digital currencies, Anti-Money Laundering and Counter-Terrorist Financing regulations and identifying use cases for deployment of blockchain solutions within government.

Nick is a member of the Standards Australia Technical Committee on Blockchain and Distributed Ledger Standards and a participant in the International Standards Organisation Study Group on Identity on the Blockchain.
