AUSTRALIA

Australian Green Building Delegation to India 2026

Join Australian Green Building Delegation to India from 23-28 November 2026 and explore business opportunities within India's rapidly growing green built environment and urban development sector.

About the programme

The business program comprises targeted market engagement activities in **Hyderabad (23-24 November) and Mumbai (25-28 November)**, including market briefings, business meetings, site visits, B2B meetings, industry roundtables, networking events with industry leaders, and participation in the Green Building Congress 2026 conference in Mumbai. Together, these activities provide a platform for delegates to showcase Australian capabilities in the infrastructure sector and accelerate business development in one of the world's fastest-growing markets.

The 24th edition of Green Building Congress 2026, organised by the Confederation of Indian Industry - Indian Green Building Council (CII IGBC), will be held from 26-28 November 2026 at the Jio World Convention Centre, Mumbai. The conference and expo will showcase cutting-edge products, technologies and solutions that advance the green and net-zero building agenda, while bringing together architects, developers, engineers, policymakers and industry leaders to exchange insights and explore emerging opportunities.

Why you should participate

- Discover new business opportunities in India’s rapidly growing green building, sustainable construction and urban development sector.
- Showcase your innovative products, technologies, solutions, and services to key industry stakeholders and decision-makers.
- Network with leading developers, architects, consultants, infrastructure companies, and government representatives through targeted business meetings and networking events.
- Connect with potential partners and customers by leveraging Austrade’s network and in-market support.

- Gain market intelligence into recent trends, sustainability priorities, decarbonisation initiatives and emerging project opportunities in the Indian market.
- Enhance your market visibility and brand positioning at Green Building Congress 2026 and Austrade-led business engagement activities.

For more information visit www.austrade.gov.au/grants or call 13 28 78.		

Why India?

- India's real estate sector is entering a high-growth, execution-led phase driven by rapid urbanisation, infrastructure expansion, policy reforms and increasing institutional investments.
- The market is projected to reach US$1 trillion (AU$1.41 trillion) by 2030, expanding to US$5-7 trillion (AU$7-10 trillion) by 2047, and is expected to play a pivotal role in supporting India's long-term "Viksit Bharat 2047" vision.
- India's urban population is projected to nearly double, rising from 480 million in 2020 to 951 million by 2050. More than 50 percent of the urban infrastructure - new infrastructure, buildings and urban services required for 2050 is yet to be built.
- India requires US$2.4 trillion (AU$3.4 trillion) in investments by 2050 and US$10.9 trillion (AU$15.4 trillion) by 2070 to meet infrastructure needs for new resilient and green urban infrastructure.
- Tier-II and Tier-III cities are emerging as major investment destinations, supported by improving infrastructure connectivity, industrial corridors and rising demand for quality residential and commercial developments.
- Developers and investors are increasingly adopting low-carbon construction methods, smart technologies, AI-enabled proptech solutions and energy-efficient infrastructure to enhance operational efficiency, sustainability and user experience.
- The Government of India permits 100 percent Foreign Direct Investment (FDI) under the automatic route for construction development projects, including townships, housing, commercial real estate and urban infrastructure, helping attract global capital and expertise into the sector.
- The implementation of the Real Estate (Regulation and Development) Act (RERA) has enhanced transparency, accountability and consumer confidence by mandating project registration, disclosure requirements and stronger compliance standards for developers.
- Urban development is also being supported by large-scale government programmes such as the Smart Cities Mission, which has driven investments in smart mobility, energy-efficient infrastructure, water management and sustainable urban services across 100 cities.
- Australia's globally recognised expertise in these areas presents significant opportunities for collaboration and knowledge exchange.

About Hyderabad and Mumbai markets

- **Hyderabad**: Hyderabad has emerged as one of India's fastest-growing real estate and technology destinations, driven by strong expansion in IT parks, Global Capability Centres (GCCs), residential townships and commercial office developments. Rapid urbanisation, infrastructure expansion and increasing demand for premium and plotted housing developments are accelerating opportunities for sustainable real estate, smart city solutions and green building technologies. Hyderabad is also benefiting from growing investments in data centres, digital infrastructure and transit-linked urban development, positioning the city as a major hub for future-ready urban growth.
- **Mumbai**: Mumbai remains India's financial and commercial capital and one of the country's largest real estate and infrastructure market. Major projects such as metro rail expansion, coastal connectivity corridors, redevelopment initiatives, Dharavi redevelopment projects, Navi Mumbai Airport Influence Notified Area (NAINA), and Mumbai 3.0 are opening new opportunities for transit-oriented development, mixed-use projects and sustainable urban infrastructure. The city also remains a key market for green-certified commercial buildings, luxury residential developments and REIT-backed office assets, creating significant opportunities for advanced building technologies, smart infrastructure and low-carbon construction solutions.

Apply before 15 October 2026

Participant numbers are limited. Apply online at www.austrade.gov.au/INSERTURL to have our market specialists review your application. If successful, you will be sent an acceptance letter detailing the terms and conditions of acceptance and an invoice for payment. A comprehensive Event Participation Kit will be sent once the deposit has been paid.

Important information

For those considering participation in this delegation programme, Austrade recommends consulting 'Smartraveller', the Australian Government's travel advisory service (www.smartraveller.gov.au). Travel advice is updated regularly on this site. Please note that Austrade will only work with clients that maintain appropriate business ethics and demonstrate a commitment to legal obligations including anti-bribery laws, both in Australia and overseas markets. Review further information on anti-bribery at http://www.austrade.gov.au/Exporters/About-exporting/Legal-issues/Bribery-of-foreign-public-officals.

OECD Guidelines for Multinational Enterprises

The OECD Guidelines for Multinational Enterprises are internationally agreed standards for responsible business conduct the Australian Government expects enterprises operating overseas and multinational enterprises operating in Australia to comply with.

The Guidelines provide voluntary principles and standards for responsible business conduct in a variety of areas, including:

- disclosure
- human rights
- employment and industrial relations

- environment
- combating bribery, bribe solicitation and extortion
- consumer interests
- science and technology
- competition
- taxation

The Australian National Contact Point for Responsible Business Conduct (AusNCP) leads the Australian Government's work to promote the OECD Guidelines and help resolve complaints relating to their implementation.

The OECD Guidelines supplement Australian law and are not legally binding.

Resources and tools

The OECD Due Diligence Guidance for Responsible Business Conduct and related sectoral guidance help enterprises identify and mitigate adverse impacts in their operations, supply chains and other business relationships.

The OECD e-learning Academy offers free self-paced courses that are open to all stakeholders interested in learning about responsible business conduct and risk-based due diligence.
